HANGTAGS

are tags most commonly attached to garments and a wide range of other products. They serve both an informational and branding function—providing key product details while strengthening brand identity.

Our hangtags are made from high-quality materials such as standard, eco-friendly, or decorative paper. They stand out for their precision, durability, and refined finish. We offer

full customization options—from the choice of paper type, size, shape, and color to finishing details. As a result, they are not only a practical product element but also an important carrier of the brand's image and style.

HANGTAGS

FULL CUSTOMIZATION

Hangtags offer extensive customization options, allowing you to perfectly match them to the character of your brand and product:

- Paper or board type – choose from matte, glossy, eco-friendly, or textured materials.
- Shape, size, and weight – from classic forms (rectangle, square, oval) to fully custom designs on papers of various weights.
- Color scheme – fully aligned with your brand’s visual identity.
- Finishing options – including embossing, UV varnish, lamination, metallic effects, or smooth finishes.
- Print and graphic design – complete flexibility in colors, graphics, and logo placement.

Additionally, each hangtag can be equipped with a hole for a string, ribbon, or plastic fastener, allowing it to be easily adapted to different types of products while enhancing their visual appeal.

HANGTAG

SEED PAPER HANGTAGS

Made from handmade paper produced from cellulose and recycled paper, these hangtags contain embedded seeds of flowers, herbs, or even vegetables—such as chamomile, forget-me-nots, or herbs. After use, the tag can be planted in soil. Simply cover it with a thin layer of earth and water regularly. Over time, plants will grow directly from the paper.

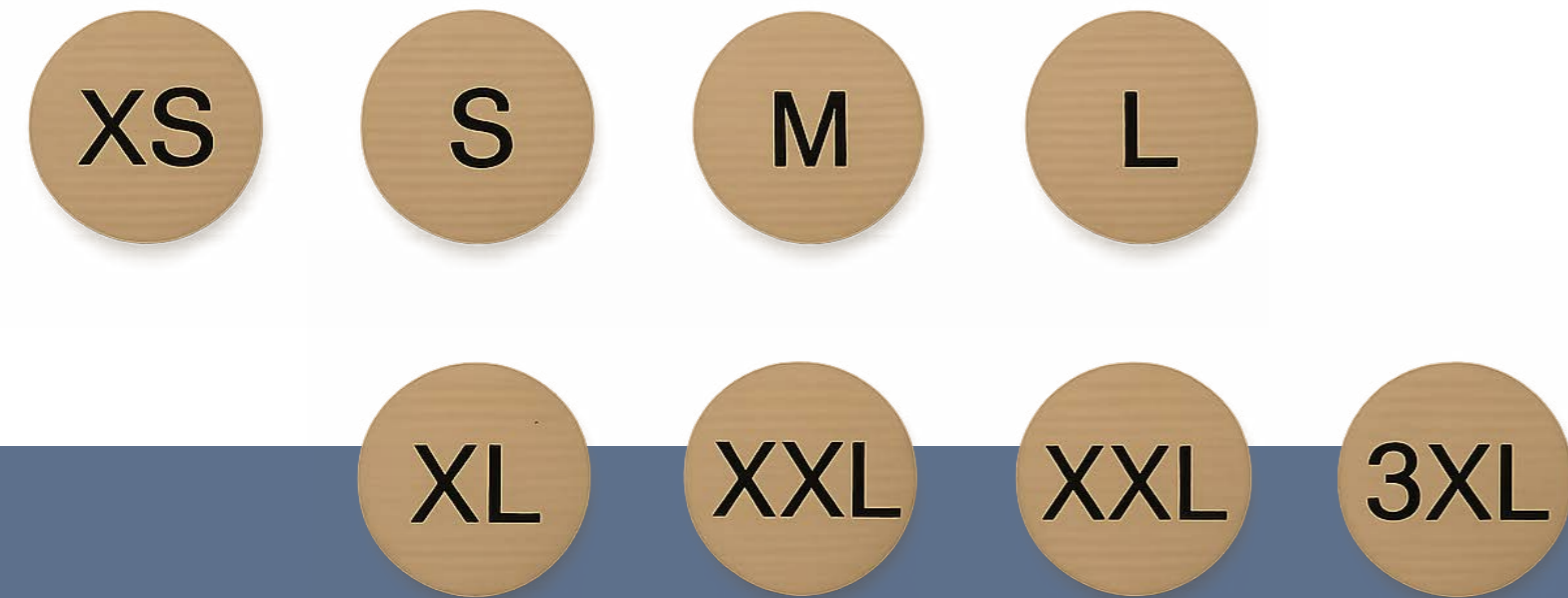

They feature a natural, irregular texture and a unique appearance, making each hangtag one of a kind. This eco-friendly solution is a sustainable alternative to traditional printed materials, highlighting your brand's environmental commitment.

NOTE! SEED PAPER HANGTAGS ARE AVAILABLE FOR HIGH-VOLUME ORDERS ONLY.

STANDARD SIZE: 5 × 9 cm

PRINT: single-sided or double-sided

SIZE STICKERS

Size stickers are a practical and aesthetic solution for product labeling, especially in the apparel, footwear, and accessories industries. They make it easy to quickly identify sizes, streamline the sales process, and improve display clarity.

They are made from high-quality self-adhesive paper, ensuring strong adhesion to various surfaces while allowing for easy application.

The stickers can feature letter sizes such as S, M, L, XL, as well as numeric sizes like 36, 38, 40, and others, depending on your needs.

Paper size stickers are a small yet essential detail that helps organize your product range, enhances the shopping experience, and reinforces a professional product presentation.

GOGGLES CASE BOX

A cardboard insert for goggle or eyewear cases is an aesthetic and functional packaging element that serves both as a protective insert and a carrier of product information. Made from high-quality 350 gsm kraft paper, it provides the necessary rigidity and durability, protecting the contents of the case from damage.

Rounded corners give it a modern, elegant look while allowing it to fit the shape of the product. Full customization is available—the insert can be printed according to the cu-

stomer's design, including logos, graphics, instructions, or brand identity elements. This makes it not only a practical addition but also an important tool for brand communication.

It is an ideal solution for manufacturers and retailers of goggles and eyewear who want to ensure a professional product presentation and a consistent brand image.

MULTIFUNCTIONAL SCARF ENVELOPE

A multifunctional scarf envelope (140 × 160 mm) is a practical and aesthetic packaging solution, ideal for both product presentation and protection. Made from high-quality 300 gsm kraft paper, it ensures the right level of stiffness, durability, and a natural, eco-friendly look.

The envelope-style design with a flap allows for easy packing and secure storage of the neck warmer, while presenting the product in a neat and attractive way.

The front features a print that can include the product name, description, usage instructions (e.g. in the form of pictograms), brand logo, and more.

The packaging can be fully customized—we offer printing based on the client's design, tailored to the character of the brand and product. This solution combines functionality with aesthetics, enhancing the product's visual appeal and supporting its sales.

MULTIFUNCTIONAL SCARF BOX

A neck warmer cardboard sleeve (160 × 130 mm) is a functional packaging solution that showcases a multifunctional neck warmer while protecting it and organizing its presentation. Thanks to specially designed cut-outs, the sleeve allows for stable product placement and attractive display on a hanger or retail shelf.

Made from durable 400 gsm kraft paper, it ensures high rigidity and strength while emphasizing the product's eco-friendly character.

The 4x4 print (full-color, double-sided) offers complete design freedom—allowing you to include brand identity graphics, images, logos, usage instructions, and marketing information on both the front and back.

WRAPPER

A paper band is a functional and aesthetic solution used for packaging and presenting textile products such as blankets, towels, T-shirts, or kitchen cloths. Its main purpose is to keep the product neatly folded, prevent it from unfolding, and give it a clean, professional appearance. The band wraps around the product without fully covering

it, allowing the color, texture, and quality of the material to remain visible. At the same time, it serves as an information carrier and a key element of brand identity, enhancing visual consistency and product appeal both on retail shelves and in e-commerce packaging.

STREAMER

ECO STREAMER

- dimensions tailored to the product
- allow for single-color printing

Suitable for packaging products such as:

- kitchen cloths
- blankets
- towels
- T-shirts

WHITE STREAMER

- dimensions tailored to the product
- allow for colorful printing

Suitable for packaging products such as:

- kitchen cloths
- blankets
- towels
- T-shirts

POLY BAGS

TISSUE PAPER

INDIVIDUAL BOXES

POLY BAG

A poly bag designed for packaging products such as T-shirts, polo shirts, or cotton bags. Made from durable plastic film, it provides effective protection against dirt, moisture, and damage during transport and storage.

Thanks to its transparency, it allows for easy identification of the contents while neatly showcasing the product. The bag can be customized with a print (e.g. logo, eco information, or product details), further enhancing the brand's visual identity.

Custom prints can be applied to the bags, tailored to the client's needs and visual identity.

BIODEGRADABLE BAGS

LDPE film is one of the most commonly used packaging materials. It is characterized by:

- high flexibility and stretchability,
- moisture resistance,
- effective protection against dirt and dust,
- suitability for packaging products with irregular shapes.

SMALL ECO PLASTIC BAG 300 × 400 mm

- LDPE film (30 microns)

Suitable for packaging products such as:

- t-shirts
- polo shirts
- cotton bags

BIG ECO PLASTIC BAG 300 × 400 mm

- LDPE film (30 microns)

Suitable for packaging products such as:

- hoodies
- jackets
- sweatshirts

Custom prints can be applied to the bags, tailored to the client's needs and visual identity.

POLYPROPYLENE BAGS

Polypropylene Bags (PP Bags)

Polypropylene bags (PP bags) are packaging solutions made from polypropylene (PP), a thermoplastic polymer. This material is known for its high mechanical strength and resistance to a wide range of chemicals. The bags can also be UV-stabilized, allowing them to be safely stored outdoors.

PP film features:

- resistance to high temperatures (up to approx. 170°C),
- good chemical resistance,
- high transparency and an aesthetically pleasing appearance,
- dimensional stability.

POLYPROPYLENE BAG

- PP film

Suitable for packaging products such as:

- t-shirts
- polo shirts
- cotton bags

ZIP-LOCK BAG

- LDPE film

Suitable for packaging products such as:

- T-shirts
- polo shirts

PAPER BAG + STICKER

A semi-transparent bag made from high-quality 35 gsm glassine paper, ideal for packaging and shipping clothing. Its structure allows for easy barcode scanning without opening the package, streamlining logistics and handling processes.

Equipped with a practical adhesive strip, it enables quick, secure, and neat sealing. The material is lightweight yet durable, providing reliable protection for the contents during transport.

An eco-friendly alternative to plastic packaging – the bag is fully recyclable, supporting environmentally responsible practices.

INDIVIDUAL BOXES

INDIVIDUAL BOXES

A die-cut box is a practical and aesthetically pleasing solution for packaging and shipping a wide range of products. Thanks to its well-designed structure, assembly is quick and intuitive, significantly streamlining the packing process—both in e-commerce and everyday warehouse operations.

The specially designed construction ensures stability and effective protection of the contents during transport. An additional locking tab secures the box against accidental opening, minimizing the risk of damage

during delivery. The high grammage of the board provides durability and resistance to deformation, allowing for safe shipping via courier services and parcel lockers.

Die-cut boxes also stand out for their visual appeal—a smooth surface and uniform color give the packaging a clean, modern look. As a result, they work well not only as transport packaging but also as an element that enhances the customer experience when receiving an order or presenting a product as a gift.

We deliver projects tailored to the **client's individual needs**—in terms of dimensions, construction, as well as the type of board and finishing.

CARDBOARD BOXES

- weight: 25 g/m²
- eco-friendly product, fully recyclable

Suitable for packaging various types of products, depending on size.

PRINTED BOXES

- weight: 25 g/m²
- eco-friendly product, fully recyclable

Suitable for packaging various types of products, depending on size.

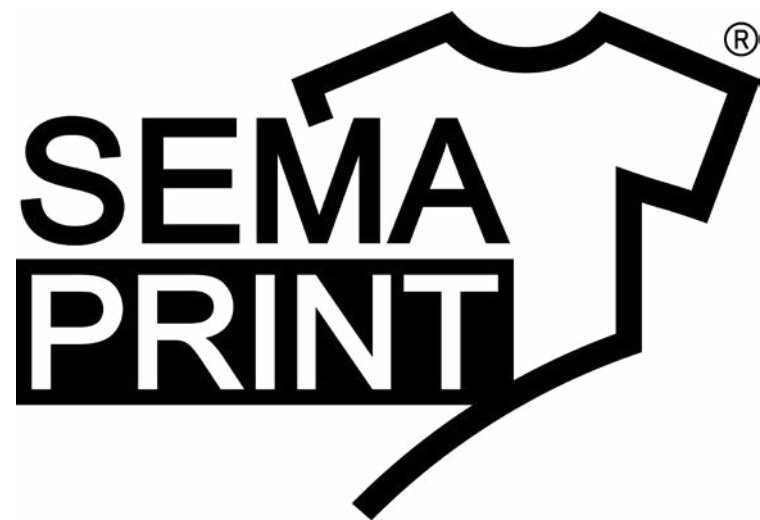

WINDOWED BOXES

- weight: 380 g/m²
- Material: 3-layer corrugated cardboard (E-flute)

Suitable for packaging various types of products, depending on size.

Lead time depends on the specifics of the order and may vary depending on the selected type of packaging, order volume, level of customization, and production technology.
