Short sleeve two-tone recycled polyester T-shirt with segmented tape

Fabric

Micro Bird-Eye.

100% recycled polyester GRS
140gsm

— MICRO BIRD-EYE —

The Micro Bird-Eye fabric is designed to deliver maximum performance under demanding conditions. Thanks to its structure with a higher number of interfibrillar spaces, it significantly improves **breathability**, facilitating thermal regulation by maintaining body temperature in cold environments while optimizing sweat evaporation.

Its smoother surface provides a superior **soft feel** while maintaining flexibility. Additionally, being a more compact fabric, it offers greater **resistance** to intensive use and excellent performance against pilling, ensuring it retains its appearance and functionality for longer.

Tapes developed by Velilla Group

This segmented and heat-sealed reflective tape offers **optimal visibility** in low-light conditions. Its heat-sealed application ensures perfect integration with the garment, without seams, resulting in a more pleasant and **comfortable** surface to the touch.

Additionally, it is certified to **withstand** 50 washes at 60°C, maintaining its reflective properties and original appearance even after prolonged use.

Level of protection against ultraviolet rays UPF 50+.
Maximum achievable level, blocking over 98% of UVA and UVB rays.

This product is made with recycled polyester certified under the international GRS standard, using the equivalent of 23 post-consumer plastic bottles.

Washing instructions

Max temp. 30°C
Do not bleach
Iron max. 110°C
Do not tumble dry
Do not use the dryer
25 washing cycles

Recommended printing techniques

Transfer

Screen printing

RET Values

RET 1,9

RET: measures the breathability of the fabric; the lower the RET value, the higher the garment's breathability.

Pilling Values

4-5

Pilling: measures the fabric's resistance to abrasion on a scale from 1 to 5. The higher the value, the greater the resistance.

UPF Protection Values

50+

UPF: measures the protection provided by the fabric against the sun's ultraviolet (UV) rays.
