Short-sleeve two-tone cotton polo shirt with segmented tape

Fabric

Piqué.

55% cotton
45% recycled polyester RCS
140g/m²

— HI VIS COTTON + RCS —

High-visibility piqué fabric whose structure is designed to maximise comfort and functionality.

Our double-sided circular-knit fabric combines durability and comfort in a single garment.

The cotton fibres are positioned on the inner side of the fabric, in direct contact with the skin, providing softness and excellent breathability.

The recycled polyester, located on the outer side, provides durability, abrasion resistance and the level of reflectance required by the EN ISO 20471 standard.

This fabric stands out for its excellent resistance to pilling, maintaining its appearance after multiple uses.

In addition, its high breathability helps wick away moisture, improving thermal comfort at all times.

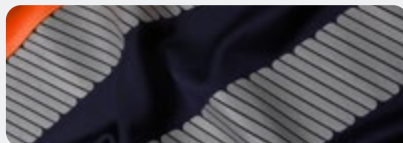

Tapes developed by Velilla Group

This segmented and heat-sealed reflective tape offers **optimal visibility** in low-light conditions.

Its heat-sealed application ensures perfect integration with the garment, without seams, resulting in a more pleasant and **comfortable** surface to the touch.

Additionally, it is certified to **withstand** 50 washes at 60°C, maintaining its reflective properties and original appearance even after prolonged use.

Breathable

Evacuates water vapor ensuring efficient thermal regulation

Level of protection against ultraviolet rays UPF 30+. Maximum achievable level, blocking over 98% of UVA and UVB rays.

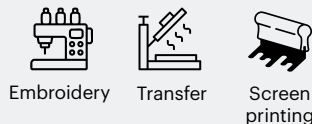

This product is made with recycled polyester certified under the international GRS standard, using the equivalent of 10 post-consumer plastic bottles.

Washing instructions

Max temp. 30°C
Do not bleach
Iron max. 110°C
Do not tumble dry
Do not use the dryer
25 washing cycles

Recommended printing techniques

RET Values

RET 2,9

RET: measures the breathability of the fabric; the lower the RET value, the higher the garment's breathability.

Pilling Values

4

Pilling: measures the fabric's resistance to abrasion on a scale from 1 to 5. The higher the value, the greater the resistance.

UPF Protection Values

30+

UPF: measures the protection provided by the fabric against the sun's ultraviolet (UV) rays.
