Fabric

Micro bird-eye.

100% recycled GRS polyester

160 g/m²

— MICRO BIRD-EYE —

The Micro Bird-Eye fabric is designed to deliver maximum performance under demanding conditions. Thanks to its structure with a higher number of interfibrillar spaces, it significantly improves breathability, facilitating thermal regulation by maintaining body temperature in cold environments while optimizing sweat evaporation.

Its smoother surface provides a superior soft feel while maintaining flexibility. Additionally, being a more compact fabric, it offers greater resistance to intensive use and excellent performance against pilling, ensuring it retains its appearance and functionality for longer.

Cool Menthol Boost

High-performance textile finish designed to deliver an immediate and long-lasting cooling sensation. Formulated with odorless **menthol** derivatives capable of activating the skin's natural cooling receptors, creating an instant **cooling effect**.

RET Values

RET 2,18

RET: measures the breathability of the fabric; the lower the RET value, the higher the garment's breathability.

Pilling Values

4

Pilling: measures the fabric's resistance to abrasion on a scale from 1 to 5. The higher the value, the greater the resistance.

UPF Protection Values

50+

UPF: Level of protection against ultraviolet rays UPF 50+. Maximum achievable level, blocking over 98% of UVA and UVB rays.

Tapes developed by Velilla Group

This segmented and heat-sealed reflective tape offers optimal visibility in low-light conditions. Its heat-sealed application ensures perfect integration with the garment, without seams, resulting in a more pleasant and comfortable surface to the touch.

Additionally, it is certified to withstand 50 washes at 60°C, maintaining its reflective properties and original appearance even after prolonged use.

Antibacterial

Antibacterial treatment that prevents bad odors

Breathable

Evacuates water vapor ensuring efficient thermal regulation

Cool Menthol Boost

Immediate and long-lasting freshness sensation

Antibacterial treatment with silver ions that prevents the proliferation of bacteria and the formation of unpleasant odors.

Washing instructions

Max temp. 30°C

Do not bleach

Iron max. 110°C

Do not tumble dry

Do not use the dryer

50 washing cycles

Certifications

Garment certifications

EN 20471

2

Intermediate visibility level. Suitable for work in moderately hazardous environments, where there is low light or bad weather and traffic does not exceed 60 km/h.

ISO
13688

Quality standard regarding ergonomics, safety, size designation, aging, compatibility, and marking of protective clothing (P.P.E.)

Garment designed under the **Velilla Group Ecodesign management system ISO 14006**.

Certified by AENOR ISO 14006 ED-0002/2024

Global Recycled Standard, establishes the requirements for the certification of recycled material content

Velilla Group certifications

Management system that allows the company to control its environmental aspects.

Certified by AENOR ISO 14001 GA-2023/0227

Sets certified as Class 3

Sets certified as Class 3 according to the EN ISO 20471 standard **consist of an upper garment and trousers**, both individually certified (Class 2), which, when combined, **achieve the highest level of visibility and protection** for the user.
